Editorial
Is postoperative nausea and vomiting still the big “little” problem?

Review Article
Perioperative lung-protective ventilation strategy reduces postoperative pulmonary complications in patients undergoing thoracic and major abdominal surgery

Statistical Round
Nonparametric statistical tests for the continuous data: the basic concept and the practical use

Clinical Research Articles
The effect of electromagnetic guidance system on early learning curve of ultrasound for novices
Comparison of clinical validation of acceleromyography and electromyography in children who were administered rocuronium during general anesthesia: a prospective double-blinded randomized study
The effect of Valsalva maneuver in attenuating skin puncture pain during spinal anesthesia: a randomized controlled trial
Can bedside patient-reported numbness predict postoperative ambulation ability for total knee arthroplasty patients with nerve block catheters?
Arrhythmogenic potential develops rapidly at graft reperfusion before the start of hypotension during living-donor liver transplantation
Changes in cerebral oxygen saturation and early postoperative cognitive function after laparoscopic gastrectomy: a comparison with conventional open surgery
Effects of intraoperative single bolus fentanyl administration and remifentanil infusion on postoperative nausea and vomiting

Experimental Research Article
Lipofundin® MCT/LCT 20% increase left ventricular systolic pressure in an ex vivo rat heart model via increase of intracellular calcium level

Case Reports
Vagally mediated atrioventricular block with ventricular asystole immediately after assuming prone position under spinal anesthesia
Paraplegia following cervical epidural catheterization using loss of resistance technique with air
Usefulness of intraoperative bronchoscopy during surgical repair of a congenital cardiac anomaly with possible airway obstruction
Stanford type A aortic dissection in a patient with Marfan syndrome during pregnancy
Cerebral air embolism and subsequent transient neurologic abnormalities in a liver transplant recipient following the removal of the pulmonary artery catheter from the central venous access device
Effectiveness of applying continuous positive airway pressure in a patient with paradoxical vocal fold movement after endotracheal extubation
Carbon dioxide pneumothorax occurring during laparoscopy-assisted gastrectomy due to a congenital diaphragmatic defect
Arytenoid dislocation after uneventful endotracheal intubation

Letter to the Editor
Statistical review of 95 studies employing repeated-measures analysis of variance published in the Korean Journal of Anesthesiology
