Supplementary Fig. 7. Screenshot of EIT monitoring screen showing the global ventilation at the top and the 4 regions of interest (ROI). With patient in the supine posture, ROI 1 represents the ventral most region of the thorax and ROI 4 represents the dorsal most region of the thorax. The dynamic ventilation image and the end-tidal snapshot image are shown in the left side of the screenshot. On the right side the respiratory rate per minute, global ventilation percentage and the regional ventilation (tidal volume) percentage of the 4 ROIs are shown.
