Supplementary Table 2. Quadrant analysis of the association between hemodynamic exposures and mortality in surgical and critically ill patients.

Exposures	**Surgical Patients**		**Critically ill Patients**	
	aOR per minute (95% CI)	**P-value**	**aOR per hour (95% CI)**	**P-value**
Exposure time under the low EDI and low MAP	1.012 (1.008 - 1.015)	< 0.001	1.072 (1.052 - 1.092)	< 0.001
Exposure time under the low EDI and preserved MAP	1.003 (0.998 - 1.008)	0.244	1.003 (0.990 - 1.017)	0.637
Exposure time under the preserved EDI and low MAP	1.009 (1.007 - 1.012)	< 0.001	1.035 (1.028 - 1.041)	< 0.001

aOR=adjusted odds ratio*; EDI*=easy D_AO_2 index; *MAP*=mean arterial pressure.
